A COMPLETE FAMILY OF INDUSTRIAL CLEANING EQUIPMENT

KEY FEATURES

INDUSTRIES

Machine Control Panel uses off-the-shelf toggle and marine duty switches featuring universal icons which simplifies training.

Vacuum Muffler allows machine to consistently achieve as low as 70 dBA while thoroughly drying the floor.

Squeegee Adjustments made simple tool-less maintenance of the squeegee blade.

Fill System features a retractable hose for easy filling on standard sink-faucets and a stainless screen for bucket filling.

Oversized Vacuum Screen Shut-Off quickly arrests overflow issues to protect the Vacuum Motor.

High Performance motors and down pressure provides an unmatched standard of cleaning.

- Eliminates Dust Mopping
- Scrub & Sweep Simultaneously
- Superior Expansion Joint Cleaning

RECOVERY AND VAC BOX

The Drain Saver Basket collects debris so it doesn't clog floor drains.

Water from rear squeegee travels through this hose into the recovery tank.

When the tank becomes nearly full a red indicator light in the dashboard turns on.

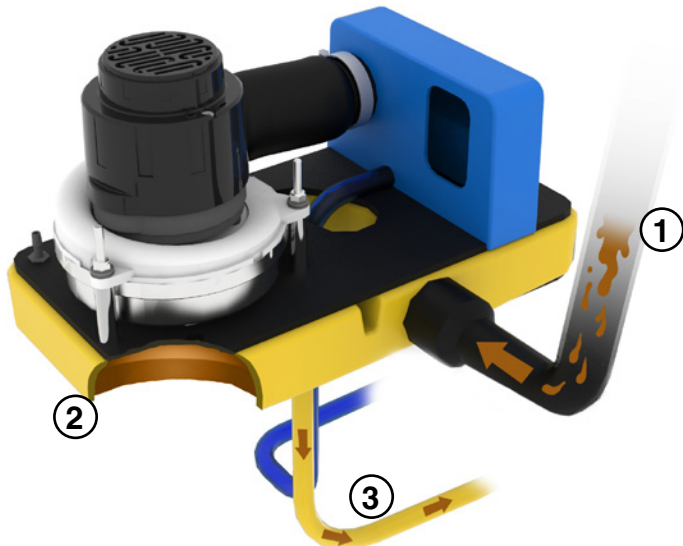

Airflow is drawn through this hose. Any water from this point will travel to the Yellow Vac Box.

When the squeegee clogs a red indicator light in the dashboard illuminates.

As the tank fills, the Float Ball rises until it is sucked into a sealed position, cutting off airflow to the vacuum motor and triggering red dash light.

Vac Box Unloader

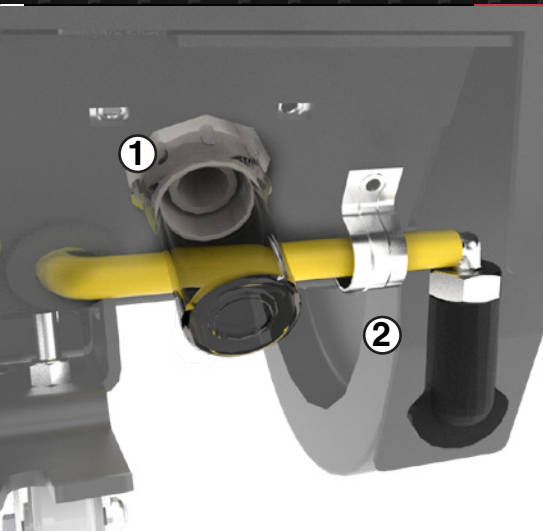

1. If dirty solution bypasses the Vacuum Filter Screen, it will flow into the Yellow Vac Box.
2. The water stays in the Yellow Vac Box chamber due to vacuum pressure and only flows out when the vacuum turns off.
3. After shutting off the vacuum, any dirty water inside the Yellow Vac Box flows out the unloader valve.

Vacuum Discharge

1. In the rare case the Yellow Vac Box overfills, water will pass through the motor.
2. Water passing through the Vacuum Motor exhausts in the Blue Reservoir where it will drain down the unloader valve located in the rear of the machine.
3. A clear bowl shows water has passed through the Vacuum Motor. There is an overflow hose so that extra water flows freely out the blue drain hose.

SERVICE CABINET

- 1**  **VACUUM DISCHARGE:**

Water passed through the Vacuum Motor will be visible in the reservoir and excess will flow from the blue hose. Indicates service required.
- 2**  **VAC BOX UNLOADER:**

Unloader valve for the Yellow Vac Box. Water present in the Yellow Vac Box will drain when vacuum is off.
- 3**  **SOLUTION FILTER:**

Standard Solution Feed Filter for scrubdeck.
- 4**  **SUDS DRAIN:**

Drain detergent from Suds reservoir.
- 5**  **ZER03 FILTER:**

Optional ZerO3 (O3+) Ozone System Solution Filter.
- 6**  **BATTERY DRAIN:**

Drain any fluid from Poly Battery Box.

COMMON OPTIONS

Spray Jet allows operators to spray down hard to reach areas

Work Lights illuminate surroundings for better visibility

Suds - Universal soap proportioning system with two dilution levels

ZER03 - Chemical free solution created on-site and on-demand

Side Doors protect scrubdeck from impact damage

Side Brooms sweep up against walls and under racking

Cleaning Solution Resource
Since 1967**

Bortek has over 50 years' experience in the Power Cleaning Equipment and Commercial Supply Industry. We've maintained the best employees, amazing customers, world-class customer service, awesome power cleaning equipment, best-in-the-biz liquid cleaners, and an extensive selection of commercial supplies.

We get a real kick out of helping our customers with their cleaning equipment and commercial supply needs. We love what we do and we're pumped to work with you. Running and managing aspects of a business can be a total headache in and of itself. Maintaining your facility or being responsible for road maintenance/clean-up, just adds to that pressure behind your eyeballs. It's a raw deal sometimes, we understand. That's part of why we do what we do. We like things to be simple.
