

PowerBoss
The Power of Clean

OSHA silica dust ruling beginning June 23, 2017

PowerBoss can help you comply. www.sweeperland.com

PowerBoss manufactures industrial cleaning equipment west of Chicago Illinois. We have been manufacturing industrial cleaning equipment since 1985.

PowerBoss has MERV 17 rider sweepers that comply with the OSHA dust control standards. The filtration system on the sweeper must be 99% efficient to 0.3 micron. .03 micron at 99% efficiency requires a MERV 17 HEPA dust filter to comply.

PowerBoss MDC sweepers offer a productive method of sweeping with **maximum dust control**.

5 stages of Maximum Dust Control filtration:

- ✓ **Stage 1** Vacuumized main broom chamber.
- ✓ **Stage 2** Perma Pre-Filter
- ✓ **Stage 3** (pleated filter) 95% to 98% efficient from 2.0 – 5.0 micron
- ✓ **Stage 4** Aggressive filter vibration system
- ✓ **Stage 5** (MERV 17/ HEPA) 95% to 99% efficient from .30 – 1 micron

Two **PowerBoss** Sweepers to choose from

Armadillo 9X sweeper
