

CONFIDENCE IN CLEANING™

FEATURE	1100SRX
Working width with central brush	31 inches
Working width with side brush	44 inches
Hopper Capacity	98 gal
Number of side brushes/inches	1 brush - 18 inches
Traction Motor/ Central Brush Motor	Orbital Hydraulic (Both)
Vacuum Motor	Gear Hydraulic
Vacuum Air Flow	525 ft³/hr.
Vacuum Filter Material (µm)	Cloth (15µm)
Batteries (V/Ah) (Number of Batteries)	6/370 (6)
Forward speed	5.28 mph
Productivity	130,000 ft²/hr.
Turning Circle	60 inches
Type of dumping system	Automatic
Dumping Height	53 inches
Machine dimensions L x H x W (inches)	80x56x45
Machine w/ optional roof dimensions L x H x W (inches)	80x87x45
Machine weight (without batteries)	1,653 lbs
Machine weight (with batteries+operator)	≈3,042 lbs

Bortek is a locally owned, family company and has been for over 50 years. We've done so with the proud tradition of putting our customers first. Our purpose is to consistently provide the best possible solutions and support to solve our customers' facilities maintenance, cleaning, and sanitation problems.

Each and every one of our over 16,000 customers is special with unique cleaning problems. At Bortek, our level of experience remains unmatched and allows us to create solutions that are tailored to your specific needs.

KEY COMPONENTS

HAMMERHEAD®

ENGINEERED SIMPLICITY™

1100**SRX**

- 1 Adjustable steering wheel and driver's seat
- 2 Safety Strobe
- 3 Intuitive instrument panel shows all machine functions
- 4 Full access to the battery compartment
- 5 Hydraulic traction drive
- 6 Floating and self-adjusting brush
- 7 Side Brush for maximum cleaning efficiency
- 8 Electric filter shaker
- 9 Cloth Filter allows the 1100SRX to filter even in environments with a presence of fine dust
- 10 Front debris hopper with hydraulic dumping

The main broom on the 1100**SRX** is easily accessed through the side doors. Gone are the days of sweating into your eyeballs and wrestling with the broom just to get it out and put in a new one. A simple twist and pull/push and you're ready to go!

These bad mamma jammies are **LED** headlights so they're bright, they last far longer than incandescent bulbs, they're impossible to miss, and they highlight the path in front of you, even in poor lighting. The side broom is also easily seen so you have a clear line-of-sight of where you're sweeping. You'll sweep like a pro without even trying!

The instrument panel on the 1100**SRX** is designed with the end-user in mind. Everything is labelled so even someone with no prior training can intuitively operate this machine. Lights light up, switches are strangely rewarding to flip, and you'll get a kick out of how easy this machine is to operate.

The design of the 1100**SRX** makes it so you can get onto the machine from either side- which can be extremely handy!

Full-access to the sweeper's main components allows for easy prepping and maintenance.

Our 1100**SRX** has proven itself worthy of the **HAMMERHEAD** name. With its effective and efficient sweeping power, this machine is designed to tackle even the most grueling sweeping demands your facility has. Sure, that's great and all, but what makes it such a great tool to have in place is that it's been designed with a heavy dose of the all-too-rare common sense. "Engineered Simplicity" isn't just a tagline. It's our way of thinking. We've worked really hard to make these machines easy to operate and maintain. Even better, these monsters will keep your facility in pristine condition with minimal effort, making it cleaner and healthier for your employees and customers alike.

Everybody wins.

The **HAMMERHEAD® 1100SRX** is the perfect rider sweeper for cleaning even the most stubborn dirt on large outdoor and indoor surfaces in warehousing, foundries, manufacturing plants, stadiums, casinos, parking garages, and more. Maximize your productivity with this battery-powered rider sweeper and cover more than 65,616 sq. ft. per hour. The 1100**SRX** sweeper is perfect for cleaning where traditional sweepers simply can't reach. As a result of our exclusive semi-permanent bag house filter system, this affordable machine is especially great in high-dust environments. No more expensive disposable panel filters means lower cost and less waste for the environment.

The exclusive **Electric over Hydraulic System** is designed to maximize sweeping power while providing an efficient use of energy. This power-house will clean as much as **200,000 sq. ft.** of smooth concrete on a single charge. The 1100**SRX** has Industrial Strength 400Ah Batteries which cost a fraction of what a monobloc battery does.

When it comes to recharging this machine, we're adamant about keeping it simple. Just plug the **on-board battery charger** into any 120V outlet and you're ready to go overnight! No need to deal with those costly and bulky external chargers that limit your storage options and are a pain to lug around.

The overall result of the combination of these elements is the considerable reduction in consumption compared to other sweepers in this class. To guarantee maximum driving comfort for the operator at all times and maximum reliability, all the main functions are hydraulic: Traction, Lifting and Emptying the Hopper, Rotating brushes, and the Vacuum Dust Impeller. This exclusive Electric over Hydraulic System provides the power and performance of a propane/gasoline sweeper at a **fraction of the cost, with less maintenance, and significant noise level reduction** in your facility.

Studied to provide **maximum driving comfort** for the operator, **maximum accessibility** for routine maintenance, and to have **reduced running costs**, the 1100**SRX** sweeper have been engineered to make the operator's job comfortable and effortless. This machine has been designed with you in mind: the driver's seat can be accessed from both sides and the elegant instrument panel allows the operator to always have the situation under control. The 1100**SRX** rider sweeper is designed to provide maximum access to the battery compartment, which makes any kind of routine and in-depth maintenance able to be completed with minimal effort.

We've got you covered when it comes to operating this sweeper. Common sense is hard-wired into the design in order to be as user-friendly and intuitive as possible, allowing you to focus on keeping your facility in pristine condition with the effective cleaning power of **HAMMERHEAD®**.
