GENERAL INFORMATION

GENERAL INFORMATION

CONVENTIONS

Forward, backward, front, rear, left or right are intended with reference to the operator's position, that is to say in driving position with the hands on the handlebar.

MACHINE LIFTING

**WARNING!**

Do not work under the lifted machine without supporting it with safety stands.

MACHINE TRANSPORTATION

**WARNING!**

Before transporting the machine, make sure that:

- *All covers are closed.*
- *The ignition key is removed.*
- *The machine is securely fastened to the means of transport.*

OTHER REFERENCE MANUALS

The following manuals are available at Advance Literature Service Department:

- **Adfinity™ 17ST, 20ST, X20R: User Manual - Form Number 9096912000**
- **Adfinity™ 17ST, 20ST, X20R: Spare Parts List - Form Number 9096913000**
- **Adfinity™ 20D, X20D, X20C, X24D: User Manual - Form Number 9096910000**
- **Adfinity™ 20D, X20D, X20C, X24D: Spare Parts List - Form Number 9096911000**
- Installation instructions counter hour kit - Form Number 9096952000
- Installation instructions for extra pressure kit - Form Number 909 6759 000
- Installation instructions for splash guard kit - Form Number 909 6745 000
- Installation instructions for battery charger kit - Form Number 909 6746 000
- Installation instructions for EcoFlex™ system kit Delta 6 - Form Number 9096936000
- Installation instructions for EcoFlex™ system kit Delta 7- Form Number 909 6747 000

GENERAL INFORMATION

SAFETY

The following symbols indicate potentially dangerous situations. Always read this information carefully and take all necessary precautions to safeguard people and property.

SYMBOLS

**DANGER!**

It indicates a dangerous situation with risk of death for the operator.

**WARNING!**

It indicates a potential risk of injury for people or damage to objects.

**CAUTION!**

*It indicates a caution related to important or useful functions.
Pay careful attention to the paragraphs marked by this symbol.*

**NOTE**

It indicates a remark related to important or useful functions.

**CONSULTATION**

It indicates the necessity to refer to the User Manual before performing any procedure.

GENERAL INSTRUCTIONS

Specific warnings and cautions to inform about potential damages to people and machine are shown below.

**DANGER!**

- *Before performing any maintenance, repair, cleaning or replacement procedure disconnect the battery connector and (if equipped) remove the ignition key.*
- *This machine must be used by properly trained operators only.*
- *Keep the battery away from sparks, flames and incandescent material. During the normal operation explosive gases are released.*
- *Do not wear jewels when working near electrical components.*
- *Do not work under the lifted machine without supporting it with safety stands.*
- *Do not operate the machine near toxic, dangerous, flammable and/or explosive powders, liquids or vapours: This machine is not suitable for collecting dangerous powders.*
- *Battery charging produces highly explosive hydrogen gas. Keep the tanks lifted during battery charging and perform this operation in well-ventilated areas and away from naked flames.*

GENERAL INFORMATION

**WARNING!**

- Carefully read all the instructions before performing any maintenance/repair procedure.
- Before using the battery charger, ensure that frequency and voltage values, indicated on the machine serial number plate, match the electrical mains voltage.
- Do not pull or carry the machine by the battery charger cable and never use the battery charger cable as a handle. Do not close a door on the battery charger cable, or pull the battery charger cable around sharp edges or corners. Do not run the machine on the battery charger cable.
- Keep the battery charger cable away from heated surfaces.
- Do not use the machine if the battery charger cable or plug is damaged. If the machine is not working as it should, has been damaged, left outdoors or dropped into water, return it to the Service Center.
- To reduce the risk of fire, electric shock, or injury, do not leave the machine unattended when it is plugged in. Before performing any maintenance procedure, disconnect the battery charger cable from the electrical mains.
- Do not smoke while charging the batteries.
- To avoid any unauthorized use of the machine, remove the ignition key (if equipped).
- Do not leave the machine unattended without being sure that it cannot move independently.
- Always protect the machine against the sun, rain and bad weather, both under operation and inactivity condition. Store the machine indoors, in a dry place: This machine must be used in dry conditions, it must not be used or kept outdoors in wet conditions.
- Before using the machine, close all doors and/or covers.
- Do not allow to be used as a toy. Close attention is necessary when used near children.
- Use only as shown in this Manual. Use only Advance's recommended accessories.
- Take all necessary precautions to prevent hair, jewelry and loose clothes from being caught by the machine moving parts.
- Do not use the machine on slopes with a gradient exceeding the specifications.
- Do not tilt the machine more than the angle indicated on the machine itself, in order to prevent instability.
- Do not use the machine in particularly dusty areas.
- While using this machine, take care not to cause damage to people or objects.
- Do not bump into shelves or scaffoldings, particularly where there is a risk of falling objects.
- Do not put any can containing fluids on the machine.
- The machine operating temperature must be between +32°F and +104°F (0°C and +40°C).
- The machine storage temperature must be between +32°F and +104°F (0°C and +40°C).
- The humidity must be between 30% and 95%.
- When using floor cleaning detergents, follow the instructions on the labels of the detergent bottles.
- To handle floor cleaning detergents, wear suitable gloves and protections.
- Do not use the machine as a means of transport.
- Do not allow the brushes to operate while the machine is stationary to avoid damaging the floor.
- In case of fire, use a powder fire extinguisher, not a water one.
- Do not tamper with the machine safety guards and follow the ordinary maintenance instructions scrupulously.
- Do not allow any object to enter into the openings. Do not use the machine if the openings are clogged. Always keep the openings free from dust, hairs and any other foreign material which could reduce the air flow.
- Do not remove or modify the plates affixed to the machine.
- (Only for Adfinity™ X20R, 20D, X20D, X20C, X24D): When the machine is to be pushed for service reasons (missing or discharged batteries, etc.), the speed must not exceed 2.5 mph (4 km/h).
- This machine cannot be used on roads or public streets.
- Pay attention during machine transportation when temperature is below freezing point. The water in the recovery tank or in the hoses could freeze and seriously damage the machine.
- Use only brushes and pads supplied with the machine or those specified in the Instructions for use. Using other brushes or pads could reduce safety.
- In case of machine malfunctions, ensure that these are not due to lack of maintenance. Otherwise, request assistance from the authorized personnel or from an authorized Service Center.
- In case of part replacement, order ORIGINAL spare parts from an authorized Dealer or Retailer.
- To ensure the proper and safe operation of the machine, have the scheduled maintenance, detailed in the relevant chapter of this Manual, performed by the authorized personnel or an authorized Service Center.
- Do not wash the machine with direct or pressurized water jets, or with corrosive substances.
- The machine must be disposed of properly, because of the presence of toxic-harmful materials (batteries, etc.), which are subject to standards that require disposal in special centers (see the User Manual).

GENERAL INFORMATION

TECHNICAL DATA (For Adfinity™ 17ST, 20ST, X20R)

Model	Adfinity™ 17ST (1 brush/pad-holder without drive system))	Adfinity™ 20ST (1 brush/pad-holder without drive system))	Adfinity™ X20R (Rotating and vibrating deck with drive system)
Machine height	41.6 in (1,058.5 mm)		
Solution/clean water tank capacity	10.5 gal (40 litres)		
Recovery water tank capacity	10.5 gal (40 litres)		
Min/max solution flow	0 ÷ 0,42 gal/min (0 ÷ 1,6 lt/min)		
Solution/clean water autonomy	0.29 gal/min (1,1 lt/min) ~ 36 min Media/Average		
Front wheel diameter	7.9 in (200 mm)		
Front wheel specific pressure on the ground *	174 lbf/in ² (1.2 N/mm ²)		362 psi (2.5 N/mm ²)
Rear wheel specific pressure on the ground *	435 lbf/in ² (3 N/mm ²)		319 psi (2.2 N/in)
Rear wheel diameter	3.9 in (100 mm)		
Minimum turning radius	23,6 in (600 mm)	25,6 in (650 mm)	25,6 in (650 mm)
Vacuum system motor power	0.44 hp (330 W)		
Drive system motor power	-		0.26 HP (200 W)
Drive speed (variable)	-		0 to 3.5 mph (0 to 5.6 km/h)
Working gradeability	2% - 1°		
Sound pressure level (at the operator's position) (ISO 11201, ISO 4871) (LpA)	66 dB(A) ± 3dB(A)		69 dB(A) ± 3 dB(A)
Sound pressure level (to the machine) (ISO 3744, ISO 4871) (LwA)	84 dB(A)		87 dB(A)
Vibration level at the operator's arms (ISO 5349-1)	< 98,4 in/s ² (< 2.5 m/s ²)		
Standard batteries	WET (2 x 12V) 24V 105 Ah		
Standard batteries autonomy	~ 3,2h		
Battery compartment size (width x length x height)	13.8 x 13.8 x 11.8 in (350 x 350 x 300 mm)		
Total consumption in work condition	29 A		50 A
Vacuum system circuit capacity	41.5 in H ₂ O (1,055 mm H ₂ O)		
Cleaning width	18.0 in (450 mm)	21.0 in (530 mm)	20 in (508 mm)
Squeegee width	30.0 in (760 mm)		
Machine maximum length	46.8 in (1,190 mm)	48.3 in (1,228 mm)	49 in (1,245 mm)
Machine width without squeegee	20.1 in (512 mm)	21.2 in (540.8 mm)	21 in (533 mm)
Brush diameter	18.0 in (450 mm)	21.0 in (530 mm)	20.0 in (508 mm)
Deck right/left offset	1,5/- in (37,1/- mm)	3/- in (75,9/- mm)	3.7 in (95 mm)
Brush distance from the ground (when lifted)	2,4 in (60,1 mm)		3.1 in (80 mm)
Weight without batteries and with empty tanks	194.0 lb (88 kg)		236 lb (107 kg)
Maximum weight with batteries and full tanks (GVW)	479.6 lb (218 kg)		516 lb (234 kg)
Brush motor power	0.65 hp (480 W)		0.75 HP (560 W)
Brush speed	153 rpm		2,250 rpm
Brush/pad-holder pressure	42.0 lb (19.0 kg)	45.1 lb (20.5 kg)	48 lb (21.8 kg)
Brush/pad-holder pressure with extra-pressure function turned on (optional)	-	-	66 lb (30.0 kg)

(*) Machine test have been performed under the following conditions:

- Battery maximum size
- Brush and squeegee maximum size
- Full clean water tank
- Optional equipment installed
- Wheel weight checked
- Each wheel print checked on cement
- Result expressed as maximum value for both front and rear wheels

GENERAL INFORMATION

MAINTENANCE

The lifespan of the machine and its maximum operating safety are ensured by correct and regular maintenance

WARNING!

Read carefully the instructions in the Safety chapter before performing any maintenance procedure.

The following tables provides the scheduled maintenance. The intervals shown may vary according to particular working conditions, which are to be defined by the person in charge of the maintenance.

For instructions on maintenance procedures, see the following paragraphs.

SCHEDULED MAINTENANCE TABLE

Procedure	Daily, after machine use	Weekly	Every six months	Yearly
Battery charging				
Squeegee cleaning				
Brush/pad cleaning				
Tank and vacuum grid with float cleaning, and cover gasket check				
Squeegee blade check and replacement				
EcoFlex™ system cleaning and draining				
Solution/clean water filter cleaning				
Battery (WET) fluid level check				
Vacuum system motor filter cleaning				
Screw and nut tightening check			(1)	
Brush/pad-holder motor carbon brush check or replacement				
Vacuum system motor carbon brush check or replacement				
Drive system motor carbon brush check or replacement (For Adfinity™ X20R, 20D, X20D, X20C, X24D)				

(1): And after the first 8 working hours.

GENERAL INFORMATION

MACHINE NOMENCLATURE (For Afinity™ 17ST, 20ST, X20R)

Throughout this Manual you will find numbers in brackets – for example: (2). These numbers refer to the components indicated in these two nomenclature pages. Refer to these pages whenever you need to identify a component mentioned in the text. Portare la macchina su un pavimento pianeggiante.

SOLUTION/CLEAN WATER SUPPLY SYSTEM

SOLUTION/CLEAN WATER SUPPLY SYSTEM

SOLUTION/CLEAN WATER TANK AND SUPPLY SYSTEM CLEANING

1. Drive the machine to the appointed solution disposal area.
2.
 - (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "0".
 - (For **Adfinity™ 17ST, 20ST**) Turn off the switches (71) and (73).
3. Empty the solution/clean water tank (20) with the hose (17).
4. Start the machine (as shown in the User Manual) and keep it running until the solution/clean water tank is completely empty.
5.
 - (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "0".
 - (For **Adfinity™ 17ST, 20ST**) Turn off the switches (71) and (73).
6. Clean the tank (20) with clean water.
7. Start the machine (as shown in the User Manual) and keep it running until the solution/clean water tank is completely empty.
8. Clean the solution filter (see the following procedure).

SOLUTION FILTER CLEANING (For Adfinity™ 17ST, 20ST)

1. Drive the machine on a level floor.
2. Turn off the switches (71) and (73).
3. Close the solution tap (A) under the machine left lower side. The tap (A) is closed when it is on the position (B) and it is open when it is on the position (C).
4. Remove the transparent cover (D), then remove the filter strainer (E). Clean and install them on the support (F).

NOTE

The filter strainer (E) must be correctly positioned on the housing (G) of the support (F).

5. Open the tap (A).

S301520A

SOLUTION/CLEAN WATER SUPPLY SYSTEM

SOLUTION FILTER CLEANING (For Adfinity™ 20D)

1. Drive the machine on a level floor.
2. Turn the ignition key (80) to "0".
3. Close the solution tap (A) under the machine left lower side. The tap (A) is closed when it is on the position (B) and it is open when it is on the position (C).
4. Remove the transparent cover (D), then remove the filter strainer (E). Clean and install them on the support (F).

NOTE

The filter strainer (E) must be correctly positioned on the housing (G) of the support (F).

5. Open the tap (A).

S301521A

SOLENOID VALVE DISASSEMBLY/ASSEMBLY (For Adfinity™ 17ST, 20ST)

Disassembly

1. Remove the brush.
2. Lower the deck by pressing the pedal (11).
3. Remove the screw (A), disconnect the connector (B) and recover the gasket.
4. Disconnect the union (C) from the solenoid valve (D) and recover the gasket.
5. Remove the screws (E).
6. Slightly lift the solenoid valve (D), disconnect the union (F) and recover the gasket.
7. Recover the solenoid valve (D).

Assembly

8. Assemble the components in the reverse order of disassembly.

S301522A

SOLUTION/CLEAN WATER SUPPLY SYSTEM**SOLENOID VALVE DISASSEMBLY/ASSEMBLY (For Adfinity™ X20R)****Disassembly**

1. Lower the deck by pressing the pedal (11).
2. Disconnect motor connectors, water line to deck at union (F) and two mounting screws holding deck to lift arms (G).
3. Remove deck
4. Remove the screw (A), disconnect the connector (B) and recover the gasket.
5. Disconnect the union (C) from the solenoid valve (D) and recover the gasket.
6. Remove the screws (E).
7. Recover the solenoid valve (D).

Assembly

8. Assemble the components in the reverse order of disassembly.

SOLUTION/CLEAN WATER SUPPLY SYSTEM

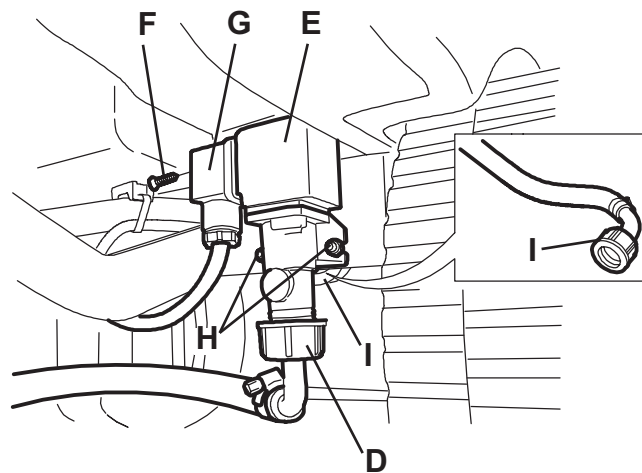

SOLENOID VALVE DISASSEMBLY/ASSEMBLY (For Adfinity™ 20D, X20D, X20C, X24D)

Disassembly

1. (For machines with brushes/pad-holders) Remove the brushes/pad-holders.
2. Lower the deck by pressing the pedal (11).
3. (For Adfinity™ 20D) Loosen the clamp (A) and disconnect the hoses (B) from the filter assembly (C).
4. Disconnect the union (D) from the solenoid valve (E) and recover the gasket.
5. Remove the screw (F), disconnect the connector (G) and recover the gasket.
6. Remove the nuts (H).
7.
 - (For Adfinity™ 20D) Remove the solenoid valve (E) with the hoses (B). If necessary, separate the hoses (B) from the solenoid valve.
 - (For Adfinity™ X20D, X20C, X24D) Move the solenoid valve (E) and disconnect it from the union (I).

Assembly

8. Assemble the components in the reverse order of disassembly.

S301523A

TROUBLESHOOTING

Small amount of solution or no solution reaches the brush

Possible causes:

1. The solution/clean water filter is clogged/dirty (clean).
2. The solution/clean water tap is stuck closed (replace).
3. The solenoid valve is broken or there is an open in the electrical connection (replace the solenoid valve/repair the electrical connection).
4. There is debris in the solution tank clogging the output hole (clean the tank).
5. There are debris in the solution/clean water hoses clogging the flow (clean the hoses).

The solution/clean water reaches the brush also when the machine is off

Possible causes:

1. There is dirt or calcium deposit on the solenoid valve gasket (clean).
2. The solenoid valve is broken (replace).

ECOFLEX™ SYSTEM

CLEAN WATER FILTER CLEANING (For Adfinity™ X20D, X20C, X24D)

1. Drive the machine on a level floor.
2. Turn the ignition key (80) to "0".
3. Open the cover (22) and check that the recovery water tank (21) is empty, otherwise empty it with the drain hose (16).
4. Grasp the handle (41) and carefully lift the tank (40).
5. Slightly lift the hoses (A), then, operating on the clean water filter assembly (F), unscrew the transparent cover (B) and remove the filter strainer (C). Clean and install them on the support (D).

NOTE

The filter strainer (C) must be correctly positioned on the housing (E) of the support (D).

6. Install the hoses (A) and the filter assembly (F).

S301524A

ECOFLEX™ SYSTEM

DETERGENT TANK CLEANING (For Adfinity™ X20R, X20D, X20C, X24D)

1. Drive the machine to the appointed detergent disposal area.
2. Turn the ignition key (80) to "0".
3. Open the cover (22) and check that the recovery water tank (21) is empty, otherwise empty it with the drain hose (16). Close the cover (22).
4. Grasp the handle (41) and carefully lift the tank (40).
5. Unscrew the union and remove the hose (48) from the tank (45).
6. Remove the tank (45) by releasing it from the fasteners.
7. Unscrew the plug (A) and wash the detergent tank (B) in the appointed detergent disposal area. If necessary, remove the supply hose (C) and clean it, especially in area of the vacuum end pipe (D). Install the supply hose (C).
8. Check that the plug vent hole (E) is not clogged, by driving in air and checking if it comes out from the outer hole (F). If necessary clean the hole with compressed air. Install the plug (A).
9. Install the tank (45) and connect it to the hose (48).
10. When the detergent tank and the supply hose have been drained, the EcoFlex™ system must be drained too (see the procedure in the following paragraph).

S301525A

ECOFLEX™ SYSTEM DRAINING (For Adfinity™ X20R, X20D - X20C - X24D)

1. Clean the detergent tank, then remove the detergent remained in the hoses and in the pump.
2. Grasp the handle (41) and carefully lower the tank (40).
3. Turn on the machine by turning the ignition key (80) to "I".
4. Turn on the EcoFlex™ system by pressing the switch (77). Check that the switch warning led (78) turns on.
5. Press the switches (77) and (82a) at the same time, until the switch warning led (78) starts flashing (after about 5 seconds).
6. Release the switches and wait for the warning led (78) to stop flashing and for the vacuum system to turn on.
7. Collect the detergent remained on the floor.
8. Turn the ignition key (80) to "0".
9. Grasp the handle (41) and carefully lift the tank (40), then check that the hose (48) is empty, otherwise perform steps 3 to 9 again.

NOTE

The draining cycle lasts about 30 seconds, then the vacuum function automatically turns on, which allows to remove the detergent remained. The draining cycle can also be performed with the detergent tank (45) full of water, thus cleaning the system thoroughly.

It is advisable to perform the draining cycle when the EcoFlex™ system is really dirty/encrusted because the machine has not been used/cleaned for a long time.

The draining cycle can be performed also to quickly fill the detergent supply hose when the tank (45) is full but the system is still empty.

If necessary, the draining cycle can be repeatedly performed.

ECOFLEX™ SYSTEM**WATER PUMP DISASSEMBLY/ASSEMBLY (For Adfinity™ X20R, X20D, X20C, X24D)****Disassembly**

1. If the tank (21) contains recovery water:
 - Drive the machine to the appointed recovery water disposal area.
 - Turn the ignition key (80) to "0".
 - Empty the recovery water tank (21) with the hose (16).
2. Drive the machine on a level floor.
3. Turn the ignition key (80) to "0".
4. Grasp the handle (41) and carefully lift the tank (40).
5. Disconnect the connector (A).
6. Loosen the clamps (B) and disconnect the hoses (C) from the water pump (D).
7. Remove the screws (E).
8. Remove the water pump (D).

Assembly

9. Assemble the components in the reverse order of disassembly.

S301526A

ECOFLEX™ SYSTEM

DETERGENT PUMP AND CHECK VALVE DISASSEMBLY/ASSEMBLY (For Adfinity™ X20R)

Disassembly

1. If the tank (21) contains recovery water:
 - Drive the machine to the appointed recovery water disposal area.
 - Turn the ignition key (80) to "0".
 - Empty the recovery water tank (21) with the hose (16).
2. Drive the machine on a level floor.
3. Turn the ignition key (80) to "0".
4. Grasp the handle (41) and carefully lift the tank (40).
5. Unscrew the union (A).
6. Remove the detergent tank (B).
7. Remove the screws (C).
8. Slightly lift the tank holder (D) and mark the position of the connectors (E) and (F) (to reinstall them correctly), which must be as follows:
 - Connector (E): white cable
 - Connector (F): blue cable
9. Disconnect the connectors (E) and (F) from the detergent pump (G).
10. Disconnect the hoses (H) from the relevant union.
11. Remove the screws (I) and recover the detergent pump (G) together with the hoses.
12. If necessary, disconnect the hoses (J) and (K) from the pump.
13. If necessary, to reinstall the components correctly, mark the position of the arrow (M), which must be as shown in the figure, and replace the check valve (L).

Assembly

14. Assemble the components in the reverse order of disassembly.

ECOFLEX™ SYSTEM

DETERGENT PUMP AND CHECK VALVE DISASSEMBLY/ASSEMBLY (For Adfinity™ X20R)
 (Continues)

S301527

ECOFLEX™ SYSTEM

DETERGENT PUMP AND CHECK VALVE DISASSEMBLY/ASSEMBLY (For Adfinity™ X20D, X20C, X24D)

Disassembly

2. If the tank (21) contains recovery water:
 - Drive the machine to the appointed recovery water disposal area.
 - Turn the ignition key (80) to "0".
 - Empty the recovery water tank (21) with the hose (16).
2. Drive the machine on a level floor.
3. Turn the ignition key (80) to "0".
4. Grasp the handle (41) and carefully lift the tank (40).
5. Unscrew the union (A).
6. Remove the detergent tank (B).
7. Remove the screws (C).
8. Slightly lift the tank holder (D) and mark the position of the connectors (E) and (F) (to reinstall them correctly), which must be as follows:
 - Connector (E): white cable
 - Connector (F): blue cable
9. Disconnect the connectors (E) and (F) from the detergent pump (G).
10. Disconnect the hoses (H) from the relevant union.
11. Remove the screws (I) and recover the detergent pump (G) together with the hoses.
12. If necessary, disconnect the hoses (J) and (K) from the pump.
13. If necessary, mark the position of the arrow (M) (to reinstall the components correctly), which must be as shown in the figure, and replace the check valve (L).

Assembly

14. Assemble the components in the reverse order of disassembly.

ECOFLEX™ SYSTEM

DETERGENT PUMP AND CHECK VALVE DISASSEMBLY/ASSEMBLY (For Adfinity™ X20D, X20C, X24D) (Continues)

S301526A

ECOFLEX™ SYSTEM

TROUBLESHOOTING

Small amount of detergent or no detergent reaches the brushes

Possible causes:

1. The detergent flow percentage is too low (check/change the percentage as shown in the User Manual).
2. The hydraulic circuit upstream of the detergent pump is not triggered (check if the hose (48) is filled and, if necessary, perform one or more draining cycle, as shown in the relevant paragraph).
3. The pump is broken or there is an open in the electrical connection (replace the pump/repair the electrical connection).
4. There is debris in the detergent tank clogging the output hole (clean the tank).
5. There are debris in the detergent hoses clogging the detergent flow (clean the hoses).
6. The detergent flow control switch is malfunctioning (check that the warning led (78) turns on; if necessary, replace the function electronic board).
7. The function electronic board is not set for the operation with EcoFlex™ system (if present, remove the jumper wire (J4) behind the electronic board).
8. The function electronic board is faulty (replace).

The detergent reaches the brushes also when the machine is off

Possible causes:

1. The pump is broken (replace).
2. The one-way valve is broken (replace).

There is water in the detergent tank

Possible cause:

1. The one-way valve is broken (replace).

The EcoFlex™ system does not turn on when pressing the switch (77) and the warning led (78) does not turn on

Possible causes:

1. The function electronic board is not set for the operation with EcoFlex™ system (if present, remove the jumper wire (J4) behind the electronic board).
2. The function electronic board is faulty (replace).

S301568A

BRUSHING SYSTEM**BRUSHING SYSTEM****BRUSH/PAD CLEANING****CAUTION!**

It is advisable to wear protective gloves when cleaning the brushes/pads because there may be sharp debris.

1. Remove the brushes/pads, as shown in the User Manual.
2. Clean and wash the brushes/pads with water and detergent.
3. Check that the brush/pads are integral and not excessively worn; otherwise replace them.
4. (For **Adfinity™ X20C**) Remove the debris container (A) by pulling it on one side with the handle (B). Empty and wash the debris container (A), and then install it by engaging it on the inside fasteners.

S301529A

BRUSHING SYSTEM

BRUSH/PAD-HOLDER BRUSH DECK DISASSEMBLY/ASSEMBLY (For Adfinity™ 17ST, 20ST)

The machine can be equipped with either the brush/pad-holder deck or the cylindrical brush deck.

Disassembly

1. Drive the machine on a level floor.
2. Remove the brushes/pad-holders, as shown in the User Manual.
3. Lower the brush/pad-holder deck by pressing the pedal (11).
4. Disconnect the brush/pad-holder motor electrical connection (A).
5. Remove the screw (B) and disconnect the electrical connection (C).
6. Disconnect the solution hose connection (D).
7. Remove the screws (F), then remove the brush/pad-holder deck (E).

Assembly

8. Assemble the components in the reverse order of disassembly.

S301529A

BRUSHING SYSTEM**DECK DISASSEMBLY/ASSEMBLY (For Adfinity™ X20R)****Disassembly**

1. Drive the machine on a level floor.
2. Lower the deck by pressing the pedal (11).
3. Disconnect the deck motor electrical connection (A).
4. Disconnect the solution hose connection (B).
5. Remove the screws (C), then remove the deck assembly.

Assembly

8. Assemble the components in the reverse order of disassembly.

BRUSHING SYSTEM

BRUSH/PAD-HOLDER/CYLINDRICAL BRUSH DECK DISASSEMBLY/ASSEMBLY (For Adfinity™ 20D, X20D, X20C, X24D)

The machine can be equipped with either the brush/pad-holder deck (18a and 18b) or the cylindrical brush deck (18c), according to the following procedures.

CAUTION!

When the deck is installed/removed, it may be necessary to change the squeegee too, because they must have the same width. For correct matching of deck and squeegee, see the Squeegee Installation paragraph in the User Manual.

Disassembly

1. Drive the machine on a level floor.
2. Remove the brushes/pad-holders, as shown in the User Manual. Do not remove the cylindrical brushes.
3. Lower the brush/pad-holder deck by pressing the pedal (11).
4. Remove the cotter pins (B), then remove the gas spring (A), if present.
5. Disconnect the brush/pad-holder motor electrical connection (D).
6. Disconnect the solution hose connection (E).
7. Remove the screws (C), then remove the brush/pad-holder deck (F).

Assembly

1. Assemble the components in the reverse order of disassembly, and note the following:
 - When the machine is equipped with the cylindrical brush deck (18c), the gas spring (A) must not be installed.

NOTE

Figure showing Adfinity™ 20D with one brush

S301531A

BRUSHING SYSTEM**BRUSH MOTOR ELECTRICAL INPUT CHECK (For Adfinity™ 17ST, 20ST)****WARNING!**

This procedure must be performed by qualified personnel only.

Check

1. If the tank (21) contains recovery water:
 - Drive the machine to the appointed recovery water disposal area.
 - Turn off the switches (71) and (73).
 - Empty the recovery water tank (21) with the hose (16).
2. Drive the machine on a level floor.
3. Remove the brush/pad-holder.
4. Lower the deck by pressing the pedal (11).
5. Turn off the switches (71) and (73).
6. Grasp the handle (41) and carefully lift the tank (40).
7. Apply the amperometric pliers (A) on one cable (B) of the brush motor (C).
8. Turn on the brush/pad-holder by pressing the switch (71) and check that the motor electrical input is 3 - 4 A at 24 V. Turn off the brush/pad-holder by pressing the switch (71).
Remove the amperometric pliers (A).
If the electrical input is higher, perform the following procedures to detect and correct the abnormal input:

**NOTE**

If the electrical input is higher than the maximum allowed value, the 3 battery warning leds (81) flash simultaneously.

- Check the tightening of F1 fuse screw (see the procedure in Fuse Check/Replacement paragraph).
 - Check if there is dust or dirt (ropes, cables, etc.) on the brush/pad-holder hub.
 - Check the motor carbon brushes (see the procedure in the relevant paragraph).
 - Disassemble the motor (see the procedure in the relevant paragraph), and check the condition of all its components.
- If the above-mentioned procedures do not lead to a correct electrical input, the motor must be replaced (see the procedure in the relevant paragraph).

Reset

10. Perform steps 3 to 7 in the reverse order.

S301533A

BRUSHING SYSTEM

BRUSH MOTOR ELECTRICAL INPUT CHECK (For Adfinity™ X20R)

**WARNING!**

This procedure must be performed by qualified personnel only.

Check

1. Drive the machine on a level floor.
2. Jack one of the drive wheel off of the floor.
3. Lower the deck with a red pad or brush attached into the floor by pressing the pedal (11).
4. Apply the amperometric pliers on one cable of the brush motor.
5. Turn to speed adjuster (84) to idle and turn the ignition key (80) to "I".
6. Turn on the brush motor by pressing the switch (71) and then pressing and holding the drive paddle (3).
7. Check the motor electrical current input . It should measure less than 20 amps.
8. Turn off the motor by releasing the drive paddle (3) and by pressing the switch (71). Turn the ignition key (80) to "0". Remove the amperometric pliers. Lower the drive wheel to floor and remove jack.
9. If the electrical input is higher, perform the following procedures to detect and correct the abnormal input:

**NOTE**

If the electrical input is higher than the maximum allowed value, the 3 battery warning leds (81) flash simultaneously.

- Check the tightening of F1 fuse screw (see the procedure in Fuse Check/Replacement paragraph).
- Check the motor carbon brushes (see the procedure in the relevant paragraph).
- Disassemble the motor (see the procedure in the relevant paragraph), and check the condition of all its components.

If the above-mentioned procedures do not lead to a correct electrical input, the motor must be replaced (see the procedure in the relevant paragraph).

BRUSHING SYSTEM**BRUSH MOTOR ELECTRICAL INPUT CHECK (For Adfinity™ 20D, X20D)****WARNING!**

This procedure must be performed by qualified personnel only.

Check

1. If the tank (21) contains recovery water:
 - Drive the machine to the appointed recovery water disposal area.
 - Turn the ignition key (80) to "0".
 - - Empty the recovery water tank (21) with the hose (16).
2. Drive the machine on a level floor.
3. Remove the brush/pad-holder.
4. Lower the deck by pressing the pedal (11).
5. Turn the ignition key (80) to "0".
6. Grasp the handle (41) and carefully lift the tank (40).
7. (For **Adfinity™ X20D**)
 - Unscrew the union (A).
 - Remove the detergent tank (B).
 - Remove the screws (C).
 - Slightly lift the tank holder (D) and mark the position of the connectors (E) and (F) (to reinstall them correctly), which must be as follows:
 - Connector (E): white cable
 - Connector (F): blue cable
 - Disconnect the connectors (E) and (F) from the detergent pump (G).
 - Disconnect the hoses (H) from the union (I) and remove the tank holder (D) together with the detergent pump (G).
8. Apply the amperometric pliers (J) on one cable (K) of the brush motor (L).
9. Turn the speed adjuster (4) to idle and turn the ignition key (80) to "I".
10. Turn on the brush/pad-holder by pressing the switch (71) and check that the motor electrical input is 3 - 4 A at 24 V. Turn off the brush/pad-holder by pressing the switch (71).
Turn the ignition key (80) to "0".
Remove the amperometric pliers (J).
If the electrical input is higher, perform the following procedures to detect and correct the abnormal input:

**NOTE**

If the electrical input is higher than the maximum allowed value, the 3 battery warning leds (81) flash simultaneously.

- Check the tightening of F1 fuse screw (see the procedure in Fuse Check/Replacement paragraph).
- Check if there is dust or dirt (ropes, cables, etc.) on the brush/pad-holder hub.
- Check the motor carbon brushes (see the procedure in the relevant paragraph).
- Disassemble the motor (see the procedure in the relevant paragraph), and check the condition of all its components.
If the above-mentioned procedures do not lead to a correct electrical input, the motor must be replaced (see the procedure in the relevant paragraph).

Reset

11. Perform steps 3 to 7 in the reverse order.

BRUSHING SYSTEM

BRUSH MOTOR ELECTRICAL INPUT CHECK (For Adfinity™ 20D, X20D) (Continues)

S301534A

BRUSHING SYSTEM

BRUSH MOTOR ELECTRICAL INPUT CHECK (For Adfinity™ X20C)

**WARNING!**

This procedure must be performed by qualified personnel only.

Check

1. Remove the cylindrical brushes, as shown in the User Manual.
2. Lower the deck by pressing the pedal (11).
3. Apply the amperometric pliers (A) on one cable (B) of the brush motor (C).
4. Turn the speed adjuster (4) to idle and turn the ignition key (80) to "I".
5. Turn on the brushes by pressing the switch (71) and check that the motor electrical input is 5 - 8 A at 24 V. Turn off the brushes by pressing the switch (71).
Turn the ignition key (80) to "0".
Remove the amperometric pliers (A).

If the electrical input is higher, perform the following procedures to detect and correct the abnormal input:

**NOTE**

If the electrical input is higher than the maximum allowed value, the 3 battery warning leds (81) flash simultaneously.

- Check the tightening of F1 fuse screw (see the procedure in Fuse Check/Replacement paragraph).
- Check if there is dust or dirt (ropes, cables, etc.) on the brush hub.
- Check the motor carbon brushes (see the procedure in the relevant paragraph).
- Disassemble the motor (see the procedure in the relevant paragraph), and check the condition of all its components.

If the above-mentioned procedures do not lead to a correct electrical input, the motor must be replaced (see the procedure in the relevant paragraph).

Reset

11. Perform steps 1 and 2 in the reverse order.

S301535A

BRUSHING SYSTEM

BRUSH MOTOR ELECTRICAL INPUT CHECK (For Adfinity™ X24D)

WARNING!

This procedure must be performed by qualified personnel only.

Check

1. Remove the brushes, as shown in the User Manual.
2. Lower the deck by pressing the pedal (11).
3. Apply the amperometric pliers (A) on one cable (B) of the brush motor (C).
4. Turn the speed adjuster (4) to idle and turn the ignition key (80) to "1".
5. Turn on the brushes by pressing the switch (71) and check that the motor electrical input is 5 - 7 A at 24 V. Turn off the brushes by pressing the switch (71).
Turn the ignition key (80) to "0".
Remove the amperometric pliers (A).

If the electrical input is higher, perform the following procedures to detect and correct the abnormal input:

NOTE

If the electrical input is higher than the maximum allowed value, the 3 battery warning leds (81) flash simultaneously.

- Check the tightening of F1 fuse screw (see the procedure in Fuse Check/Replacement paragraph).
- Check if there is dust or dirt (ropes, cables, etc.) on the brush hub.
- Check the motor carbon brushes (see the procedure in the relevant paragraph).
- Disassemble the motor (see the procedure in the relevant paragraph), and check the condition of all its components.

If the above-mentioned procedures do not lead to a correct electrical input, the motor must be replaced (see the procedure in the relevant paragraph).

Reset

6. Perform steps 1 and 2 in the reverse order.

S301536A

BRUSHING SYSTEM**BRUSH MOTOR CARBON BRUSH CHECK/REPLACEMENT (For Adfinity™ 17ST, 20ST)****Check**

1. If the tank (21) contains recovery water:
 - Drive the machine to the appointed recovery water disposal area.
 - Turn off the switches (71) and (73).
 - Empty the recovery water tank (21) with the hose (16).
2. Drive the machine on a level floor.
3. Remove the brush/pad-holder.
4. Lower the deck by pressing the pedal (11).
5. Turn off the switches (71) and (73).
6. Grasp the handle (41) and carefully lift the tank (40).
7. Disconnect the battery connector (12).
8. Remove dust and dirt from the motor carbon brush support area (A).
9. Disengage the fasteners (B) and (C) and remove four carbon brush supports (A). If necessary, disconnect the electrical connections (D).
10. Check if the carbon brushes (E) are worn. Replace the carbon brushes when: the contact with the motor armature is insufficient, the carbon brushes are worn, the carbon brush contact surface is not integral, the thrust spring is broken, etc.
11. If necessary, disconnect the connections (F) and remove the carbon brushes with their supports (A) to replace them. Replace the carbon brushes as an assembly.

Reset

12. Assemble the components in the reverse order of disassembly, and note the following:
 - When connecting the terminals (F), take care of their insulation from the surrounding parts of the frame.

S301539A

BRUSHING SYSTEM

BRUSH MOTOR CARBON BRUSH CHECK/REPLACEMENT (For Adfinity™ 20D, X20D)

Check

1. If the tank (21) contains recovery water:
 - Drive the machine to the appointed recovery water disposal area.
 - Turn the ignition key (80) to "0".
 - Empty the recovery water tank (21) with the hose (16).
2. Drive the machine on a level floor.
3. Remove the brush/pad-holder.
4. Lower the deck by pressing the pedal (11).
5. Turn the ignition key (80) to "0".
6. Grasp the handle (41) and carefully lift the tank (40).
7. (For **Adfinity™ X20D**)
 - Unscrew the union (A).
 - Remove the detergent tank (B).
 - Remove the screws (C).
 - Slightly lift the tank holder (D) and mark the position of the connectors (E) and (F) (to reinstall them correctly), which must be as follows:
 - Connector (E): white cable
 - Connector (F): blue cable
 - Disconnect the connectors (E) and (F) from the detergent pump (G).
 - Disconnect the hoses (H) from the union (I) and remove the tank holder (D) together with the detergent pump (G).
8. Disconnect the battery connector (12).
9. Remove dust and dirt from the motor carbon brush support area (A).
10. Disengage the fasteners (K) and (L) and remove four carbon brush supports (J). If necessary, disconnect the electrical connections (M).
11. Check if the carbon brushes (N) are worn. Replace the carbon brushes when: the contact with the motor armature is insufficient, the carbon brushes are worn, the carbon brush contact surface is not integral, the thrust spring is broken, etc.
12. If necessary, disconnect the connections (O) and remove the carbon brushes with their supports (J) to replace them. Replace the carbon brushes as an assembly.

Reset

13. Assemble the components in the reverse order of disassembly, and note the following:
 - When connecting the terminals (O), take care of their insulation from the surrounding parts of the frame.

S301540A

BRUSHING SYSTEM

BRUSH MOTOR CARBON BRUSH CHECK/REPLACEMENT (For Adfinity™ 20D, X20D) (Continues)

S301541A

BRUSHING SYSTEM

BRUSH MOTOR CARBON BRUSH CHECK/REPLACEMENT (For Adfinity™ X20C)

Check

1. Remove the brush motor (see the procedure in the relevant paragraph).
2. At the workbench, remove dust and debris from the motor, especially in the area of the protection clamp (A).
3. Remove the protection clamp (A).
4. For each carbon brush, move the protection (B) and remove the screws (C).
5. Remove the carbon brushes (D).
6. Check if the carbon brushes (D) are worn. Replace the carbon brushes when: the contact with the motor armature is insufficient, the carbon brushes are worn, the carbon brush contact surface is not integral, the thrust spring is broken, etc. Replace the carbon brushes as an assembly.

Reset

7. Assemble the components in the reverse order of disassembly.

S301542A

BRUSHING SYSTEM**BRUSH MOTOR CARBON BRUSH CHECK/REPLACEMENT (For Adfinity™ X24D)****Check**

1. Remove the deck (see the procedure in the relevant paragraph).
2. At the workbench, remove dust and debris from the motor, especially in the area of the carbon brushes.
3. Remove four protection brush covers (A) by disengaging the fasteners.
4. Remove the carbon brush nuts (B) with the lead-in wires.
5. Disengage the tabs (C) and remove the carbon brushes (D).
6. Check if the carbon brushes (D) are worn. Replace the carbon brushes when: the contact with the motor armature is insufficient, the carbon brushes are worn, the carbon brush contact surface is not integral, the thrust spring is broken, etc. Replace the carbon brushes as an assembly.

Reset

7. Assemble the components in the reverse order of disassembly.

S301543A

BRUSHING SYSTEM

BRUSH MOTOR CARBON BRUSH CHECK/REPLACEMENT (For Adfinity™ X20D)

1. Remove the deck (see the procedure in the relevant paragraph).
2. Set the scrub deck on a workbench,

**NOTE**

The brush motor does not need to be removed from deck assembly.

3. Remove wire retaining nut and rubber packing.

4. Remove both through bolts.

BRUSHING SYSTEM

BRUSH MOTOR CARBON BRUSH CHECK/REPLACEMENT (For Adfinity™ X20D) (Continues)

5. Remove end plate.

6. Replace the carbon brushes.
- Observe how the springs roll when the brush is pushed back before taking it apart.
 - Remove a brush and spring.
 - Install a new brush and spring into the brush holder. Thread the brush wire lead through the brush holder. Position the back end of the brush in the "cup" of the spring so that the spring will unroll as the brush is pushed back once it is installed.

- Push brush back against the spring and insert a stiff temporary retaining wire (Paper clip) through the access hole in the end cover. (Remove silicone sealer from the holes) The wire must go through the holes in the brush holder just in front of the brush to hold the brush back against the spring pressure.

- Install the other three brushes.

BRUSHING SYSTEM

BRUSH MOTOR CARBON BRUSH CHECK/REPLACEMENT (For Adfinity™ X20D) (Continues)

7. Install the wave washer.
8. Install the end cover in stages.
 - Install it far enough so that the brushes will contact the commutator when the temporary retaining wires are removed. Then remove the wires.

- Fully seat the end cover.
- Install the through bolts.
- Seal the retaining wire holes in the end cover with silicon sealant.

BRUSHING SYSTEM**BRUSH MOTOR DISASSEMBLY/ASSEMBLY (For Adfinity™ 17ST, 20ST, 20D, X20D)****Disassembly**

1. Remove the deck (see the procedure in the relevant paragraph).
2. At the workbench, remove the screw (A) from the deck.
3. Remove the hub assembly (B) with a puller.
4. Remove the screws (C).
5. Remove the reduction unit (D).
6. If necessary, remove the water distribution union (E) and flange (F) from the reduction unit.

Assembly

7. Assemble the components in the reverse order of disassembly.

S301544A

BRUSHING SYSTEM

BRUSH MOTOR DISASSEMBLY/ASSEMBLY (For Adfinity™ X20R)

Disassembly

1. Remove the deck (see the procedure in the relevant paragraph).
2. At the workbench, remove the screw (A) and remove pad driver (B).
3. Remove counter weight screws (C) and remove counter weight.
4. Remove aluminium driver (E) with a puller if necessary.
5. Remove the screws (F) and motor (G).

Assembly

7. Assemble the components in the reverse order of disassembly.

BRUSHING SYSTEM**DECK COVER BUMPER WHEEL TORQUE (For Adfinity™ X20R)**

BRUSHING SYSTEM**DECK COVER BUMPER WHEEL TORQUE (For Adfinity™ X20R) (Continues)**

BRUSHING SYSTEM

BRUSH MOTOR DISASSEMBLY/ASSEMBLY (For Adfinity™ X20C)

Disassembly

1. Remove the cylindrical brush deck (see the procedure in the relevant paragraph).
2. At the workbench, remove the screw (A) from the motor which has to be disassembled.
3. Remove the case (B).
4. Loosen the nut (C) and move the pulley (D) to loosen the belt (E).
5. Remove the belt (E).
6. Remove the screws (F).
7. Remove the motor (G).

Assembly

8. Assemble the components in the reverse order of disassembly, and note the following:
 - The electrical connections (H) of the motor (G) must be turned upwards.
 - The connection (J) of the carbon brush protection clamps (I) must be positioned as shown in the figure.
 - Install the belt (E) and tension it properly (see the procedure in the relevant paragraph).

S301545A

BRUSHING SYSTEM

BRUSH MOTOR DISASSEMBLY/ASSEMBLY (For Adfinity™ X24D)

Disassembly

1. Remove the deck (see the procedure in the relevant paragraph).
2. At the workbench, remove the screw (A) from the reduction unit which has to be disassembled.
3. Remove the hub assembly (B) with a puller.
4. Remove the screws (C).
5. Remove the reduction unit (D).
6. Recover the key (E).

Assembly

7. Assemble the components in the reverse order of disassembly.

S301546A

BRUSHING SYSTEM**CHECK/REPLACEMENT/ADJUSTMENT OF DRIVING BELTS FROM MOTORS TO CYLINDRICAL BRUSHES (For Adfinity™ X20C)****Check**

1. Drive the machine on a level floor.
2. Turn the ignition key (12) to "0".
3. Lower the cylindrical brush deck by pressing the pedal (11).
4. Remove the screws (A) and remove the covers (B).
5. Visually inspect the belt (C) for integrity, cuts, tears or cracks, otherwise replace it according to the following procedure.
6. Check the tension of the belt (G) according to the following procedure.

Replacement

7. If the belt (G) is to be replaced, loosen the nut (D) and move the pulley (K) to loosen the belt.
8. Tension the belt (according to the following procedure).

Belt tensioning

9. Check the tension of the belt (C) from motor to brush. The tension is correct:
 - When pressing the belt in its center with a force of 22 lb (10 kg) (F), the belt bends for 0.20 in (5 mm).
 If necessary, tension the belt according to the following procedure:
10. Loosen the nut (D) and adjust the position of the pulley (E). When tensioning procedure has been carried out, tighten the nut (D).
11. Repeat step 8.

Reset

12. If Perform steps 3 and 4 in the reverse order.

S301548A

BRUSHING SYSTEM

BRUSH ENABLING MICROSWITCH ADJUSTMENT/REPLACEMENT (For Adfinity™ 20D, X20D, X20C, X24D)

1. Drive the machine on a level floor.
2. Turn the ignition key (80) to "0".
3. Disconnect the battery connector (12).
4. Remove the screws (A) and move the drive paddle cover (B).
5. Check that the springs (C) operate correctly when releasing the drive paddle (D).
6. If necessary, replace the microswitch (F) according to the following procedure:
 - Mark the position of the connectors (I) and disconnect them from the microswitch.
 - Remove the screws (M).
 - Remove the microswitch (F).
 - Install the new microswitch and fasten it with the screws, then connect the connectors (I).
7. Check that the actuator (E) of the microswitch (F) is in the housing (G) of the cam (H) when the drive paddle is released (D). Also check that the cable contacts (I) are all open (use a tester).
8. Press the drive paddle (D) and check that the actuator (E), in the positions (J) and (K) activates the microswitch (F) (a clicking sound must be heard). Also check that the cable contacts (I) are all closed (use a tester).
If necessary, to reach the above-mentioned condition, loosen the screws (L) and adjusting the position of the cam (H), and/or by loosening the screws (M) and adjusting the position of the microswitch (F). Retighten the screws.

CAUTION!

If the microswitch connections (I) are disconnected, pay attention to reconnect them on the same terminals and to leave the terminal (N) free.

9. Assemble the components by performing steps 3 and 4 in the reverse order.
10. Test the brush operation.

S301549A

BRUSHING SYSTEM**TROUBLESHOOTING****ALL BRUSHES DO NOT ROTATE**

Possible causes:

1. The brush enabling microswitch is misadjusted or broken (adjust or replace).
2. The wiring harness between microswitch and function electronic board is damaged (repair).
3. The brush motor electromagnetic switch wiring harness is damaged (repair).
4. The function electronic board is damaged (replace).
5. The wiring harness between function electronic board and brush motor electromagnetic switch is damaged (repair).
6. The brush motor electromagnetic switch is damaged (replace).
7. The brush motor fuse is open (replace).

ONE BRUSH DO NOT ROTATE (For models with two brushes)

Possible causes:

1. The motor carbon brushes are worn (replace).
2. Bulky debris or cords around the brushes or between the brushes and its flange (remove and clean the brushes).
3. The motor is faulty (repair or replace).
4. The wiring harness is damaged (repair).

RECOVERY WATER SYSTEM

RECOVERY WATER SYSTEM

RECOVERY WATER TANK AND VACUUM GRID CLEANING, AND COVER GASKET CHECK

1. Drive the machine to the appointed recovery water disposal area.
2.
 - (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "0".
 - (For **Adfinity™ 17ST, 20ST**) Turn off the switches (71) and (73).
3. Lift the cover (A) to washing position (L).
4. Wash with clean water the cover (A), the tank (B) and the vacuum grid with automatic shut-off float (D).
5. Drain the water in the tank through the hose (16).
6. If necessary, release the fasteners (E) and open the grid (D), recover the float (F), clean all the components and then reinstall them.
7. Check the tank cover gasket (G) for integrity.

NOTE

The gasket (G) creates vacuum in the tank that is necessary for vacuuming the recovery water.

If necessary replace the gasket (G) by removing it from its housing (H). When assembling the new gasket, install the joint (I) in the rear central area, as shown in the figure.

7. Check that the bearing surface (J) of the gasket (G) is integral and adequate for the gasket itself.
8. Check the compensation hole (K) for clogging, and clean it if necessary.

NOTE

The hole (K), allowing to compensate the air in the cover interspaces, contributes to create vacuum in the tank.

9. Close the cover (A).

NOTE

Figure showing **Adfinity™ X20C**.

S301551A

RECOVERY WATER SYSTEM**SQUEEGEE CLEANING/CHECK/REPLACEMENT AND SQUEEGEE BLADE REPLACEMENT****CAUTION!**

It is advisable to wear protective gloves when cleaning the squeegee because there may be sharp debris.

Disassembly and cleaning

1. Drive the machine on a level floor.
2.
 - (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "0".
 - (For **Adfinity™ 17ST, 20ST**) Turn off the switches (71) and (73).
3. Lower the squeegee (25) with the lever (10).
4. Loosen the handwheels (26) and remove the squeegee (25).
5. Disconnect the vacuum hose (15) from the squeegee.
6. Clean the steel squeegee (Fig. 1) or the aluminium squeegee (Fig. 2). Clean the compartments (A, Fig. 1 or 2) and the hole (B) especially. Check the front blade (C) and the rear blade (D) for integrity, cuts and tears; otherwise replace them (see the procedure in the following paragraph).
7. Install the squeegee in the reverse order of removal.

Check and replacement

1. Clean the steel squeegee (Fig. 1) or the aluminium squeegee (Fig. 2), according to the procedure shown in the previous paragraph.
2. Check that the edges (E, Fig. 1 or 2) of the front blade (C) and the edges (F) of the rear blade (D) lay down on the same level, along their length; otherwise adjust their height according to the following procedure:
 - Release the tie rod (G, Fig. 1 or 2) and loosen the wing nuts (H, Fig. 1), or disengage the fasteners (M, Fig. 2) and adjust the rear blade (D, Fig. 1 or 2), then tighten the wing nuts, or engage the fasteners, and then engage the tie rod.
 - Loosen the handwheels (I) and adjust the front blade (C, Fig. 1 or 2); then tighten the handwheels.
3. Check the front blade (C, Fig. 1 or 2) and rear blade (D) for integrity, cuts and tears; if necessary replace them according to the following procedure. Check that the front corner (J) of the rear blade is not worn; otherwise, overturn the blade to replace the worn corner with an integral one. If the other corners are worn too, replace the blade according to the following procedure:
 - Release the tie rod (G), remove the wing nuts (H) or disengage the fasteners (M), remove the retaining strip (K), then replace/overturn the rear blade (D). Then install the blade in the reverse order of removal.
 - Unscrew the handwheels (I) and remove the retaining strip (L), then replace the front blade (C). Install the blade in the reverse order of removal.

After the blade replacement (or overturning), adjust the height as shown in the previous step.

4. Connect the vacuum hose (15) to the squeegee.
5. Install the squeegee (25) and screw down the handwheels (26).
6. If necessary, adjust the squeegee balance adjusting handwheel (27).

RECOVERY WATER SYSTEM

SQUEEGEE CLEANING/CHECK/REPLACEMENT AND SQUEEGEE BLADE REPLACEMENT (continues)

Fig. 1

Fig. 2

S301552

RECOVERY WATER SYSTEM

VACUUM SYSTEM MOTOR FILTER CLEANING

Disassembly and cleaning

1. If the tank (21) contains recovery water:
 - Drive the machine to the appointed recovery water disposal area.
 - (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "0".
 - (For **Adfinity™ 17ST, 20ST**) Turn off the switches (71) and (73).
 - Empty the recovery water tank (21) with the hose (16).
2. Drive the machine on a level floor.
3.
 - (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "0".
 - (For **Adfinity™ 17ST, 20ST**) Turn off the switches (71) and (73).
4. Grasp the handle (41) and carefully lift the tank (40).
5. Remove the vacuum system motor filter (44) and clean it with water and compressed air.
6. Install the filter (44).

Assembly

7. Assemble the components in the reverse order of disassembly.

VACUUM SYSTEM MOTOR ELECTRICAL INPUT CHECK

WARNING!

This procedure must be performed by qualified personnel only.

1. If the tank (21) contains recovery water:
 - Drive the machine to the appointed recovery water disposal area.
 - (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "0".
 - (For **Adfinity™ 17ST, 20ST**) Turn off the switches (71) and (73).
 - Empty the recovery water tank (21) with the hose (16).
2. Drive the machine on a level floor.
3.
 - (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "0".
 - (For) Turn off the switches (71) and (73).
4. Disconnect the battery connector (12).
5. Grasp the handle (41) and carefully lift the tank (40).
6. Apply the amperometric pliers (A) on one cable (B) of the batteries.
7.
 - (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "I".
8.
 - Turn on the vacuum system by pressing the switch (73) and check that the motor electrical input is 16 - 19 A at 24 V.
 - Turn off the vacuum system by pressing the switch (73).
 - Remove the amperometric pliers (B).
 - If the electrical input exceeds the specifications, check the motor carbon brushes (see the procedure in the relevant paragraph).
 - If necessary, disassemble the vacuum system motor (see the procedure in the relevant paragraph), and check the condition of all its components.
 - If the above-mentioned procedures do not lead to a correct electrical input, the motor must be replaced (see the procedure in the relevant paragraph).
9. Perform steps 4 and 5 in the reverse order.

S301553A

RECOVERY WATER SYSTEM

VACUUM SYSTEM MOTOR CARBON BRUSH CHECK/REPLACEMENT

1. Remove the vacuum system motor (see the procedure in the relevant paragraph).
2. At the workbench, remove the cover (A) (press-fitted) from the vacuum system motor (B).
3. Remove the screws (C).
4. Disconnect the electrical connections (D).
5. Remove the carbon brushes (E).
6. Check the carbon brushes for wear. Replace the carbon brushes when: the contact with the motor armature is insufficient, the carbon brushes are worn, the carbon brush contact surface is not integral, the thrust spring is broken, etc.
7. If necessary, replace the carbon brushes. Replace the carbon brushes as an assembly.
8. Assemble the components in the reverse order of disassembly.

S301555A

RECOVERY WATER SYSTEM

VACUUM SYSTEM MOTOR DISASSEMBLY/ASSEMBLY

Disassembly

1. If the tank (21) contains recovery water:
 - Drive the machine to the appointed recovery water disposal area.
 - (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "0".
 - (For **Adfinity™ 17ST, 20ST**) Turn off the switches (71) and (73).
 - Empty the recovery water tank (21) with the hose (16).
2. Drive the machine on a level floor.
3.
 - (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "0".
 - (For **Adfinity™ 17ST, 20ST**) Turn off the switches (71) and (73).
4. Disconnect the battery connector (12).
5. Grasp the handle (41) and carefully lift the tank (40).
6. Remove the screws (A) and recover the washers.
7. Remove the motor cover (B).
8. Remove the filter (C) and the gasket (D).
9. Remove the motor (E), the sound-deadening pipe (F) and the sound-deadening panel (G).
10. Disconnect the electrical connector (H) of the motor (E).
11. Check the efficiency of the gasket (I) and, if necessary, replace it.

Assembly

12. Assemble the components in the reverse order of disassembly, and note the following:
 - If necessary, clean the filter (C) before assembling it (see the procedure in the relevant paragraph).

S301556A

RECOVERY WATER SYSTEM

SQUEEGEE SPRING CHECK/REPLACEMENT (All models, with aluminium squeegee)

Check

1. Drive the machine on a level floor.
2. • (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "0".
• (For **Adfinity™ 17ST, 20ST**) Turn off the switches (71) and (73).
3. Check that the springs (A) and (B) push the squeegee (C) on the floor correctly.
4. If necessary, disassemble and replace the springs according to the following procedure.

Disassembly

5. Remove the squeegee (see the procedure in the relevant paragraph).
6. Lift the deck by pressing the pedal (11).
7. Grasp the handlebar (2) and lower the front part of the machine.
8. Remove the cotter pin (D).
9. Disengage the end (E) of the left spring (F) from the housing (G).
10. Remove the left spring (F).
11. Repeat steps 8, 9 and 10 for the right spring (H).

Assembly

12. Assemble the springs by performing steps 5 to 11 in the reverse order.

S301557A

RECOVERY WATER SYSTEM**TROUBLESHOOTING****The vacuum system motor does not turn on**

1. The wiring harness between the function electronic board and the vacuum system relay is damaged or short-circuited (check and repair).
2. The vacuum system relay is damaged (replace).
3. The wiring harness between relay and motor is damaged (repair).
4. The vacuum system fuse is open (replace).
5. The vacuum system motor carbon brushes are worn (replace).
6. The vacuum system motor is faulty (check the electrical input).
7. The function electronic board is damaged (replace).

Dirty water vacuuming is insufficient or there is no vacuuming

Possible causes:

1. The vacuum grid with automatic shut-off float is activated because the recovery water tank is full (empty the recovery water tank).
2. The vacuum grid with automatic shut-off float is dirty, or the vacuum pre-filter is dirty (clean).
3. The tank cover is not correctly positioned (adjust).
4. The tank cover gasket is not efficient, or the compensating hole is clogged (repair/clean).
5. The vacuum system motor filter is dirty (clean).
6. The squeegee or the vacuum hose is clogged or damaged (clean or repair/replace).
7. The vacuum gaskets are damaged or do not match perfectly (repair or replace).

The squeegee leaves lining on the floor or does not collect water

Possible causes:

1. There is debris under the blade (remove).
2. The squeegee blade edges are torn or worn (replace).
3. The squeegee is not balanced (adjust it with the relevant handwheel).
4. (For aluminium squeegee) The squeegee springs are not efficient (check/replace)

DRIVE SYSTEM

DRIVE SYSTEM

TRACTION ENABLING MICROSWITCH ADJUSTMENT/REPLACEMENT (For Adfinity™ X20R, 20D, X20D, X20C, X24D)

1. Drive the machine on a level floor.
2. Turn the ignition key (80) to "0".
3. Disconnect the battery connector (12).
4. Remove the screws (A) and move the drive paddle cover (B).
5. Check that the springs (C) operate correctly when releasing the drive paddle (D).
6. If necessary, replace the microswitch (F) according to the following procedure:
 - Mark the position of the connectors (I) and disconnect them from the microswitch.
 - Remove the screws (M).
 - Remove the microswitch (F).
 - Install the new microswitch and fasten it with the screws, then connect the connectors (I).
7. Check that the actuator (E) of the microswitch (F) is in the position (G) of the cam (H) when the drive paddle is released (D).
8. Press the drive paddle (D) and check that the actuator (E), in the position (K) doesn't activate the microswitch (F). Also check that the cable contacts (I) are all open (use a tester).
9. Press the drive paddle (D) and check that the actuator (E), in the position (J) activates the microswitch (F) (a clicking sound must be heard). Also check that the cable contacts (I) are all closed (use a tester).
If necessary, to reach the above-mentioned condition, loosen the screws (L) and adjusting the position of the cam (H), and/or by loosening the screws (M) and adjusting the position of the microswitch (F). Retighten the screws.

CAUTION!

If the microswitch connections (I) are disconnected, pay attention to reconnect them on the same terminals and to leave the terminal (N) free.

10. Assemble the components by performing steps 3 and 4 in the reverse order.
11. Test the traction operation.

S301559A

DRIVE SYSTEM

MAXIMUM SPEED POTENTIOMETER DISASSEMBLY/ASSEMBLY (Adfinity™ X20R, 20D, X20D, X20C, X24D)**Disassembly**

1. Disconnect the battery connector (12).
2. Operating inside the hole (A), loosen the threaded dowel and remove the maximum speed adjuster knob (B).
3. Unscrew the potentiometer mounting nut (C).
4. Remove the screws (D) and move the cover (E).
5. Cut the fastening clamp (F) and disconnect the potentiometer connector (G).
6. Open the clamp (H).
7. Remove the potentiometer with the relevant wiring harness (I). Check and replacement

Assembly

8. Assemble the components in the reverse order of disassembly, and note the following:
 - Fasten the knob (B) with the potentiometer shaft (L) completely turned to the left and the hole (A) in the lower centre part of the panel as shown in the figure.
9. Test the drive system and the maximum speed change.

S310560A

DRIVE SYSTEM

DRIVE SYSTEM MOTOR ELECTRICAL INPUT CHECK (For Adfinity™ X20R, 20D, X20D, X20C, X24D)

WARNING!

This procedure must be performed by qualified personnel only and with the help of an assistant.

1. Check that the batteries are completely charged, otherwise charge them as shown in the User Manual.
2. If the tank (21) contains recovery water:
 - Drive the machine to the appointed recovery water disposal area.
 - Turn the ignition key (80) to "0".
 - Empty the recovery water tank (21) with the hose (16).
3. Drive the machine on a level floor.
4. Lower the deck by pressing the pedal (11).
5. Under the left side the machine, install a suitable jack (C) in the position (A), and slightly lift the machine so that the left wheel (C) can turn freely, without touching the floor or the jack.

WARNING!

While performing this procedure, pay attention to the rotation of the driving wheel (C).

6. Apply the amperometric pliers (D) on one cable (E) of the drive system motor.
7. Turn the ignition key (80) to "I".
8. Turn the speed adjuster (4) to the maximum speed.
9. With the help of an assistant who firmly keeps the machine by the handlebar, push the drive paddle (3) completely forward and check that the electrical input is 1.5 - 2.5 A at 24 V. Release the drive paddle (3). Turn the ignition key (80) to "0" and remove the amperometric pliers (D).
If the electrical input is higher, perform the following procedures to detect and correct the abnormal input:
 - Check if there is dust or debris preventing the component rotation. The lifted wheel (C) must turn freely with a slight resistance of the differential.
 - If necessary, disassemble the motor-differential (see the procedure in the relevant paragraph) then check for hub correct alignment and bearing smooth running.
 If the above-mentioned procedures do not lead to a correct electrical input, the motor must be replaced (see the procedure in the relevant paragraph).
10. Perform steps 4 and 5 in the reverse order.

S301562A

DRIVE SYSTEM

DRIVE SYSTEM MOTOR CARBON BRUSH CHECK AND REPLACEMENT (For Adfinity™ X20R, 20D, X20D, X20C, X24D)

1. Drive the machine to the appointed disposal area, and empty the recovery water tank (21) with the hose (16).
2. Place the machine on a hoisting system (if available).
Otherwise, drive the machine on a level floor.
3. Turn the ignition key (80) to "0".
4. Disconnect the battery connector (12).
5. Operating on the left side of the machine, clean the drive system motor (B) in the area of the covers (A).
6. Unscrew the covers (A) and remove the carbon brushes (C).
7. Check if the carbon brushes (C) are worn. Replace the carbon brushes when: the contact with the motor armature is insufficient, the carbon brushes are worn, the carbon brush contact surface is not integral, the thrust spring is broken, etc.
If necessary, replace the carbon brushes. Replace the carbon brushes as an assembly.
8. Assemble the components in the reverse order of disassembly.

S301563A

DRIVE SYSTEM

DRIVE SYSTEM MOTOR-DIFFERENTIAL DISASSEMBLY/ASSEMBLY (Adfinity™ X20R, 20D, X20D, X20C, X24D)

Disassembly

1. If the tank (21) and/or (20) contains recovery water:
 - Drive the machine to the appointed disposal area.
 - Turn the ignition key (80) to "0".
 - Empty the recovery water tank (21) with the hose (16).
 - Empty the solution/clean water tank (20) with the hose (17).
2. Remove the squeegee (see the procedure in the relevant paragraph).
3. Remove the batteries (see the procedure in the relevant paragraph).
4. Prepare an hoisting system (A) on which the machine is to be laid on one side. Place a panel (B) on the hoisting system to avoid damaging the machine.
5. With the help of an assistant, tilt the machine on one side and lay it on the panel (B).
6. Remove the screws (C), then remove the wheels (D) and recover the keys (E).
7. Remove the screws (F) on both sides.
8. Disconnect the connectors (G) of the drive system motor.
9. If necessary, remove the spacers (I) and the retaining rings.
10. Remove the motor-differential (J).

Assembly

11. Assemble the components in the reverse order of disassembly.

S301564A

TROUBLESHOOTING

Open circuit

Possible causes:

1. There are bulky debris or cords under the machine or around the driving wheels (remove the debris).
2. The motor is damaged (check the motor electrical input).
3. The floor gradient is excessive (do not use the drive system on slopes with a gradient exceeding the specifications).
4. There is a short circuit in the drive system electronic board harness (repair).
5. The drive system electronic board is faulty (replace).

The machine does not move

Possible causes:

1. The battery voltage is too low (charge the batteries).
2. The drive paddle potentiometer is misadjusted or broken (adjust or replace).
3. The speed adjuster is broken (replace).
4. The drive system enabling microswitch is misadjusted or broken (adjust or replace).
5. The drive system electronic board is faulty (replace).
6. There is an open in the fuse (repair).
7. The wiring harness is damaged (repair).
8. The drive system motor carbon brushes are worn (replace).
9. The drive system motor is faulty (replace).

DRIVE SYSTEM

TROUBLESHOOTING (Continues)

Drive system electronic board diagnostic table

No. of flashes (*)	Meaning	Action
1	Drive system/brush enabling microswitch closed when starting the machine	Check the microswitch adjustment
2	Faulty speed potentiometer	Check both speed potentiometers
3	Faulty speed potentiometer	Check both speed potentiometers
4	Speed potentiometer off neutral when starting the machine	Check the speed potentiometer adjustment
5	Thermal protection	Check the drive system motor electrical input
6	Faulty drive system electronic board	Replace the drive system electronic board
7	Overcurrent output	Check the drive system motor electrical input; if the electrical input is normal, replace the drive system electronic board
8	Missing power connection	Check the drive system fuse and the drive system electronic board wiring harness; if the fuse and the wiring harness are normal, replace the drive system electronic board
9	Low battery voltage	Charge the batteries
10	High battery voltage	Check the batteries
11	Overload output	Check the drive system motor electrical input
12	(Not applicable)	--
13	Ignition key wrong sequence	Check for false contacts in the ignition key – function electronic board – drive system electronic board circuit (orange cables)
14	Software error	Replace the drive system electronic board

(*) Flashing of led (A) of the drive system electronic board (B)

S301565A

OTHER SYSTEM

SCREW AND NUT TIGHTENING CHECK

1. Drive the machine to the appointed disposal area, and empty the recovery water tank (21) with the hose (16).
2. Place the machine on a hoisting system (if available).
Otherwise, drive the machine on a level floor.
3.
 - (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "0".
 - (For **Adfinity™ 17ST, 20ST**) Turn off the switches (71) and (73).
4. Grasp the handle (41) and carefully lift the tank (40).
5. Check:
 - Tightening of mounting screws and nuts;
 - Correct position of fasteners;
 - Visible faults in the components;
 - Leaks of fluids.
6. Carefully lower the tank (40).
7. Remove the machine from the hoisting system.

ELECTRICAL SYSTEM

ELECTRICAL SYSTEM

MACHINE WORKING HOUR CHECK (optional)

1. (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "1".
2. Press the vacuum system switch (73) and read on the hour counter (79) the total number of working hours (scrubbing/drying) performed by the machine.
3. Turn off the vacuum system by pressing the switch (73).
4. (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "0".

BATTERY CHARGE AND MAINTENANCE

See the User Manual.

BATTERY DISASSEMBLY/ASSEMBLY

Disassembly

1. If the tank (21) contains recovery water:
 - Drive the machine to the appointed recovery water disposal area.
 - (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "0".
 - (For **Adfinity™ 17ST, 20ST**) Turn off the switches (71) and (73).
 - Empty the recovery water tank (21) with the hose (16).
2. Drive the machine on a level floor.
3.
 - (For **Adfinity™ X20R, 20D, X20D, X20C, X24D**) Turn the ignition key (80) to "0".
 - (For **Adfinity™ 17ST, 20ST**) Turn off the switches (71) and (73).
4. Disconnect the battery connector (12).
5. Grasp the handle (41) and carefully lift the tank (40).
6. Disconnect the cables (A) from the battery terminals.
7. Remove the battery shims, if present.
8. Carefully remove the batteries (B).

Assembly

9. Assemble the batteries in the reverse order of disassembly, referring to the installation diagram (C), and note the following:
 - Set the machine according to the type of batteries installed (WET or GEL) as shown in the relevant paragraph.

S301566A

ELECTRICAL SYSTEM**BATTERY TYPE SETTING (WET OR GEL) (For For Adfinity™ 17ST, 20ST)**

Set the electronic board of the machine and of the battery charger according to the type of batteries installed (WET or GEL) as shown below:

Machine setting

1. Press the switch (71) or (73) and pay attention to the following in the very first seconds of machine operation:
 - If the green warning led (81a) is flashing, the machine is set to GEL.
 - If the red warning led (81c) is flashing, the machine is set to WET.
2. If the setting is to be changed, perform the following procedure.
3. Make sure that the switches (71) and (73) are turned off.
4. Press and hold the switches (71) and (73) at the same time.
5. Release the switches (71) and (73) at least 8 seconds after starting the machine.
6. Within three seconds, press the switch (73) again for a few seconds and check that the warning led for the required setting is flashing (as shown in step 1).

Battery charger setting

7. Remove the battery charger data inspection window screws (A).
8. Remove the window (B).
9. Turn the battery charger selector (C) to WET position for lead batteries, or to GEL position for gel batteries.
10. Install the window (B) and tighten the screws (A).

BATTERY TYPE SETTING (WET OR GEL) (For Adfinity™ X20R, 20D, X20D, X20C, X24D)

Set the electronic board of the machine and of the battery charger according to the type of batteries installed (WET or GEL) as shown below:

Machine setting

1. Turn the ignition key (80) to "I" position and pay attention to the following in the very first seconds of machine operation:
 - If the green warning led (81a) is flashing, the machine is set to GEL.
 - If the red warning led (81c) is flashing, the machine is set to WET.
2. If the setting is to be changed, perform the following procedure.
3. Turn off the machine by turning the ignition key (80) to "0".
4. Press and hold the switches (71) and (73) at the same time, then turn the ignition key (80) to "I".
5. Release the switches (71) and (73) at least 8 seconds after starting the machine.
6. Within three seconds, press the switch (73) again for a few seconds and check that the warning led for the required setting is flashing (as shown in step 1).

Battery charger setting

7. Remove the battery charger data inspection window screws (A).
8. Remove the window (B).
9. Turn the battery charger selector (C) to WET position for lead batteries, or to GEL position for gel batteries.
10. Install the window (B) and tighten the screws (A).

S301567A

ELECTRICAL SYSTEM

FUSE CHECK/REPLACEMENT

1. Disconnect the battery connector (12).
2. Move aside the recovery water drain hose (16).
3. Remove the battery charger cable (I) from the cable holder (J).
4. Remove the screws (A) and carefully move aside the panel (B) by disengaging the grommet (K) from its housing on the panel (B).
5. Check/replace the following fuses:
 - (C) - F1 fuse, deck: (40 A)
 - (D) - F2 fuse, vacuum system: (30 A)
 - (E) - F3 fuse, drive system: (30 A) (*)
 - (F) - F4 fuse, signal circuits: (3 A)
 - (G) - F5 fuse, brush/pad-holder release: (20 A) (*)
 - (H) - F6 fuse, pumps: (3 A) (*)

(*) Only for **Adfinity™ X20R, 20D, X20D, X20C, X24D**

6. Perform steps 1 to 4 in the reverse order.

S301569A

ELECTRICAL SYSTEM

BRUSH MOTOR ELECTROMAGNETIC SWITCH DISASSEMBLY/ASSEMBLY

Disassembly

1. Disconnect the battery connector (12).
2. Move aside the recovery water drain hose (16).
3. Remove the battery charger cable (6) from the cable holder (7).
4. Remove the screws (A) and carefully move aside the panel (B) by disengaging the cable grommet (C) from its housing on the panel (B).
5. Disconnect the connectors (D), (E), (F), and remove the panel (B).
6. Disconnect the terminals (G) and (H) from the electromagnetic switch (J). Disconnect also the terminals (I), which are present only on the models with drive system.
7. Remove the screws (K) and move the electrical panel (L) by disengaging it from the lower fastener (M).
8. Remove the screws (N) on the rear side of the electrical panel (L), then remove the electromagnetic switch (J).

Assembly

9. Assemble the components in the reverse order of disassembly.

S301571A

S301572A

ELECTRICAL SYSTEM

DRIVE SYSTEM ELECTRONIC BOARD DISASSEMBLY/ASSEMBLY (For Adfinity™ X20R, 20D, X20D, X20C, X24D)

Disassembly

1. Disconnect the battery connector (12).
2. Move aside the recovery water drain hose (16).
3. Remove the battery charger cable (6) from the cable holder (7).
4. Remove the screws (A) and carefully move aside the panel (B) by disengaging the cable grommet (C) from its housing on the panel (B).
5. Disconnect the connectors (D), (E), (F), and remove the panel (B).
6. Disconnect the connectors (G) of the drive system electronic board (H).
7. Remove the screws (I) and move the electrical panel (J) by disengaging it from the lower fastener (K).
8. Remove the screws (L) on the rear side of the electrical panel (J), then remove the drive system electronic board (H).

Assembly

9. Assemble the components in the reverse order of disassembly.

S301573A

S301574A

ELECTRICAL SYSTEM

FUNCTION ELECTRONIC BOARD DISASSEMBLY/ASSEMBLY

Disassembly

1. Disconnect the battery connector (12).
2. Move aside the recovery water drain hose (16).
3. Remove the battery charger cable (6) from the cable holder (7).
4. Remove the screws (A) and carefully move aside the panel (B) by disengaging the cable grommet (C) from its housing on the panel (B).
5. Disconnect the connectors (D), (E), (F), and remove the panel (B).
6. On the panel, remove the screws (G), then remove the function electronic board (H).

Assembly

9. Assemble the components in the reverse order of disassembly.

S301575A

ELECTRICAL SYSTEM

TROUBLESHOOTING

the previous chapters related to the use of the electrical system.

Other possible causes:

1. The batteries are discharged or the connections are not efficient (charge the batteries or clean the connections).
2. The batteries are broken (check the battery no-load voltage).Assembly

NOTE

A fault in the battery charger and relevant connections can affect the machine operation.

3. The battery charger is broken (replace).
4. There is an open in the fuses (replace).
5. The harness is cut, pressed or short-circuited (repair).
6. Error codes indicated by LEDs (81a - 81b - 81c):

Flashes	Meaning	Action
Green, yellow and red LED flashing simultaneously.	Problem related to brush motor overload.	Perform checks shown in BRUSH MOTOR ELECTRICAL INPUT CHECK.
		If check results are negative, check the F1 fuse for integrity and its nut tightness.
Red LED flashing.	The batteries are discharged.	Charge the batteries.
		If the problem persists, replace them.

2	Water pump power supply -	OUT	0V pulsed, according to water flow setting, only with paddle pressed and brush function activated	M4 (only for CFBA706)
3	Solution pump power supply +	OUT	24V with key on "I"	M5
4	Solution pump power supply -	OUT	0V pulsed as J3.2, when active squared wave with different frequencies according to the setting solution flow	M5
5	B-type deck configuration return	IN	24V always with cylindrical brush deck installed	CSC.2
6	Auxiliary power supply +	OUT	24V with key on "I"	CSC.1

J3 MOLEX MINIFIT type 8 ways vertical (only version 7CFBA707 - 7CFBA708)				
PIN	Description	Electronic board in/out	V ref.	Connected to
1	Water pump power supply +	OUT	24V with key on "I"	M4 (only for 7CFBA706)
2	Water pump power supply -	OUT	0V pulsed, according to water flow setting, only with paddle pressed and brush function activated	M4 (only for 7CFBA706)
3	Solution pump power supply +	OUT	24V with key on "I"	M5
4	N/A configurator supply	OUT	24V	J3.8
5	Solution pump power supply -	OUT	0V pulsed as J3.2, when active squared wave with different frequencies according to the setting solution flow	M5
6	B-type deck configuration return (7CFBA707) Brushes enabling microswitch return (7CFBA708)	IN	24V	CSC.2 (only for 7CFBA707) SW3 (only for 7CFBA708)
7	Auxiliary power supply +	OUT	24V	CSC.1 (only for 7CFBA707) SW3 (only for 7CFBA708)
8	N/A configurator return	IN	24V	J3.4

J4 JUMPER type 2 ways (only version 7CFBA700 - 7CFBA707 - 7CFBA708)
