

# HAMMERHEAD 750RDX

Available Exclusively at Bortek

	750RDX
SQUEEGEE WIDTH (INCHES)	39
DISC BRUSHES (NO.) (INCHES)	(2) 14
BRUSH MOTOR V/W	(2) 24/450
BRUSH RPM RPM	170
BRUSH PRESSURE (POUNDS)	66.14
SUCTION MOTOR V/W	24/310
TRACTION MOTOR V/W	24/400
SUCTION VACUUM MBAR	160
TURNING DIAMETER (INCHES)	75.2
TYPE OF DRIVE	aut.
BATTERY COMPARTMENT DIMENSIONS (L X H X W) (INCHES)	20.47x13.39x15.12
MAX GRADIENT AT FULL LOAD %	up to 18
BATTERIES V/AH C5	6/210 (4)
BATTERIES WEIGHT (POUNDS)	299.83
MACHINE WEIGHT (WITHOUT BATTERY) (POUNDS)	470
WORKING WIDTH (INCHES)	30
SUPPLY V/TRACTION	24/aut.
SOLUTION TANK (GALLONS)	29
RECOVERY TANK (GALLONS)	33
WORKING CAPACITY UP TO SQ.F/H	42,000
MACHINE DIMENSIONS L X H X W (INCHES)	58.86x51.97x26.77
ELECTROMAGNETIC COMPATIBILITY EMISSION STANDARD	EN 61000-6-1, 2, 3, 4

ENGINEERED SIMPLICITY™

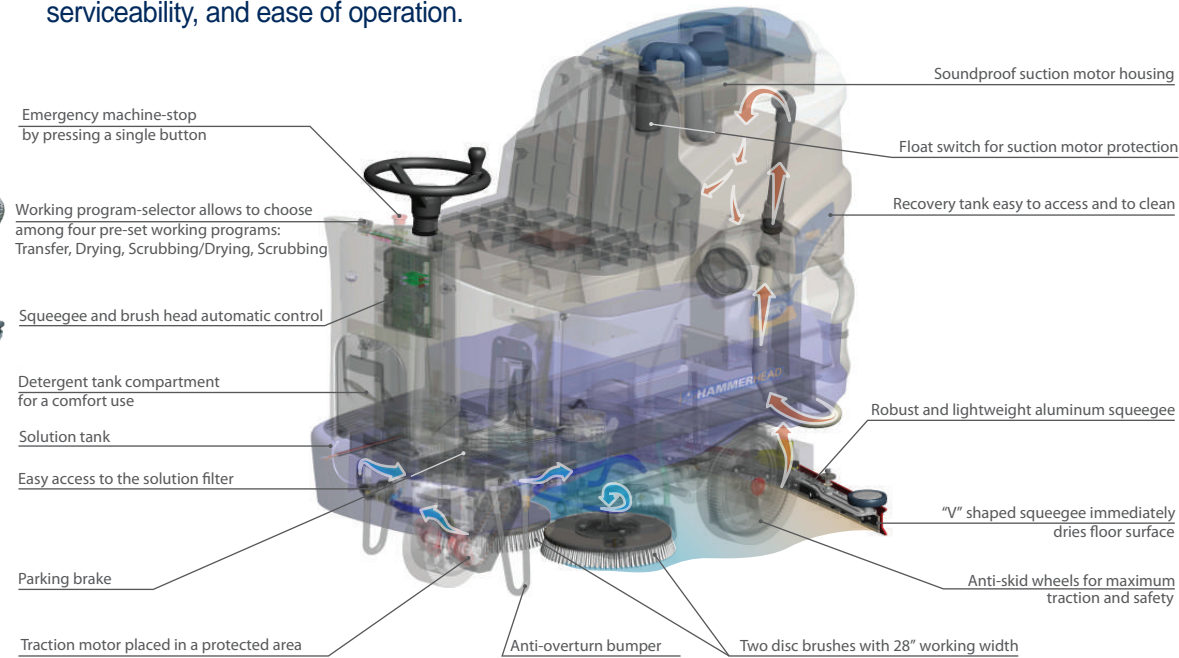

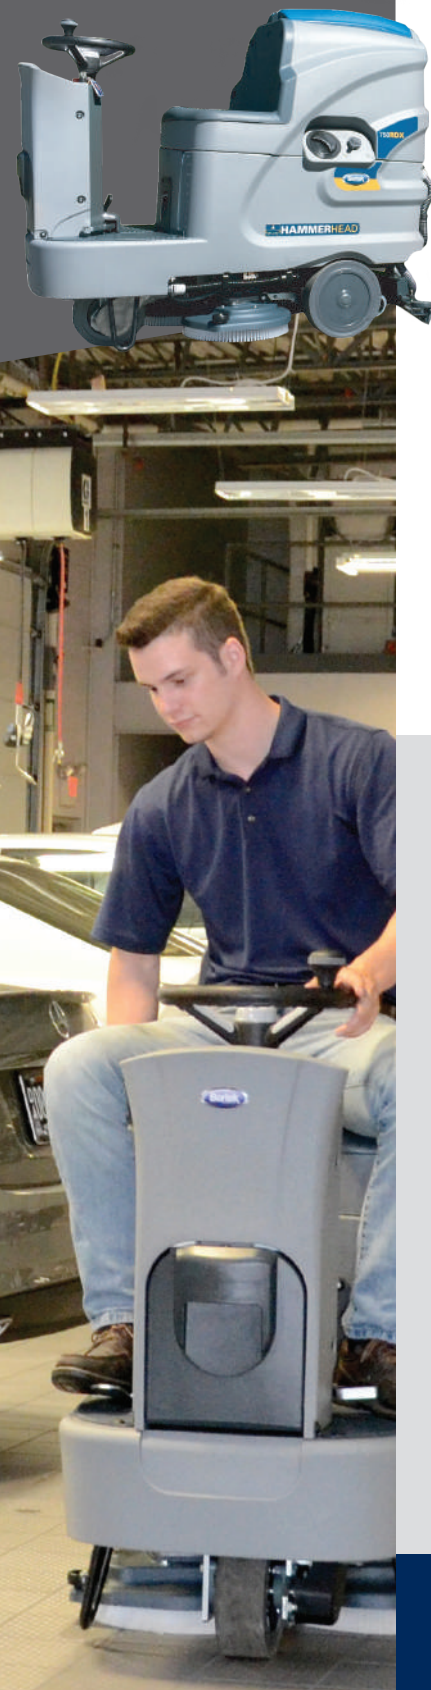

## INDUSTRIAL GRADE™

COMPACT BATTERY-POWERED  
RIDER SWEEPER/SCRUBBER

# 750 RDX HAMMERHEAD®

HammerHead® scrubbers and sweeper/scrubbers are engineered to exacting “Confidence In Cleaning” (CIC) standards based on best in class performance, value, simplicity, durability, serviceability, and ease of operation.

## EXPERIENCE A HAMMERHEAD® TODAY AT YOUR FACILITY WITH A COURTESY DEMONSTRATION.

HammerHead® scrubbers are lean, mean, industrial grade machines. They are Best-In-Class for Quality, Durability, Performance, and Warranty. This equipment maintains an incredibly quiet dB level while in use to ensure minimal impact on customers and employees throughout the work day.

Ease of use for the operator is one of the most important aspects to any floors crubber. HammerHead® scrubbers are sleekly designed so moving from room to room is a breeze. Now you can clean, really clean, those tight areas rather than ineffective, even unsanitary hand mopping.

Getting the most up-time out of a scrubber is paramount. To assist in that, there is Water-Saving Technology built into each HammerHead®. It does you, along with the environment, a favor by conserving where possible. This, of course, is an adjustable setting for those really persistent areas.

Convenience for the operator is also a hugely integrated ideology in each and every HammerHead® series. After use, these scrubbers have a very simple setup to Drain and Clean its Recovery System. Including a tilt-back recovery tank. This keeps the amount of time necessary to prepare the machine for its next use at a minimum.

FLOOR MAINTENANCE HAS NEVER BEEN SO QUICK AND EASY. CLEANING STANDARDS CAN BE MET AND SURPASSED WITH HAMMERHEAD. WITH OUR ENGINEERED SIMPLICITY ENGRAINED IN EVERY FACET OF THESE MACHINES, THEY CAN BE OPERATED BY ANYONE, EVEN UNTRAINED PERSONNEL.

### REDUCE COST TO CLEAN

- Considerably shorter time required to clean the same area versus a walk behind.
- Extreme simplicity means minimum maintenance required, which results in a lower cost to operate.
- Cleans OVER 42,000 sq. ft per hour! Achieve maximum results in minimal time.

### IMPROVE HEALTH AND SAFETY

Innovative features help protect health and safety of your operator, building occupants, and the environment. These machines ensure there are no leftover contaminants on the floor surface. With the built-in squeegee system, you not only leave behind an immediately clean floor, but a safe and dry walking surface as well.

### ENHANCE FACILITY IMAGE

Effective scrubbing capabilities and no operator fatigue systems help to maintain a consistently clean and professional appearance of your facility floors.

### MINIMIZE ENVIRONMENTAL IMPACT

Reduces the consumption of daily floor cleaning detergents to help meet your sustainability goals. With adjustable solution-flow valves, you choose how green you go!
